AI risk briefing

[Company] | [Quarter, year] | Prepared by [name, title]

Summary

[Two or three sentences, led by a fact. What changed since last time (for example: AI tools connected to customer systems went from 4 to 11), what worries us most and why, and the one decision we need from you today.]

Where we use AI

Kind of AI	How many	Can see customer or sensitive data	Can act without a person approving (send, change, pay, push code)
Employee AI tools (chat, coding and writing assistants)	#	#	#
AI features inside software we already pay for	#	#	#
AI agents and apps our teams built	#	#	#
Outside AI tools holding a login, API key or token for our accounts	#	#	#

Top three risks, in business terms

Risk	What could happen to us	Likelihood	Impact	Owner
e.g., Agent follows hidden instructions	*e.g., An email assistant forwards customer contracts to an outsider*	*L / M / H*	*L / M / H*	*[name]*
e.g., AI vendor tokens stolen	*e.g., Attackers pull our CRM data through a connected AI tool*	*L / M / H*	*L / M / H*	*[name]*
e.g., Sensitive data pasted into AI tools	*e.g., Unreleased financials or customer data leave our control*	*L / M / H*	*L / M / H*	*[name]*

What we're doing about it

- *[Action, owner, date. For example: inventory and right-size every AI vendor connection by end of quarter.]*
- *[Action, owner, date. For example: require human approval before any agent sends, deletes, pays or publishes.]*
- *[Action, owner, date]*

Decisions we need from you

- *[Risk appetite. For example: approve the rule that no AI system may move money, delete records or contact customers without a person approving.]*
- *[Investment or trade-off. For example: fund (tool or headcount), or accept (named risk) until (date).]*

Trend

Measure	Last quarter	This quarter	Target
AI tools inventoried (% of AI tools and integrations listed)	*%*	*%*	*100%*
Vendor access reviewed (% of AI integrations checked in last 90 days)	*%*	*%*	*%*
AI-related security incidents (and near misses)	#	#	-
Time to cut off all access for one breached AI vendor	*hrs*	*hrs*	*< 1 hr*
