Protect Yourself Online

For small business owners

DO THESE Your security checkup

- [ ] Require two-step login for email, banking, payroll and admin accounts.
- [ ] Confirm any change to bank details with a phone call to a known number.
- [ ] Keep an offline or versioned backup, and test restoring it.
- [ ] Turn on automatic updates and replace unsupported devices.
- [ ] Use separate admin accounts, only for people who need them.
- [ ] Turn off access the same day someone leaves.
- [ ] Set up SPF, DKIM and DMARC so no one can spoof your email.
- [ ] Review and remove apps connected to your email and files.
- [ ] Write down who to call: bank, IT, insurance, lawyer.

WATCH FOR Spot a scam

- Verify every bank detail change by calling a number you already have.
- Urgent, secret payment requests are a warning sign, even from the boss.
- Hang up on unexpected tech support calls and call your IT contact directly.

IF IT HAPPENS Got hacked?

1. Money sent? Call your bank now, then file at IC3.gov.
2. Ransomware? Disconnect affected devices, don't turn them off.
3. Call your IT help and your cyber insurance company.
4. Data taken? Talk to a lawyer about notification.

KEEP HANDY Where to get help

Report fraud to the FBI
